Procedures to file a request to the JPO (Japan Patent Office) for Patent Prosecution Highway Pilot Program between the JPO and the EAPO (Eurasian Patent Organization)

Applicants can request accelerated examination by a prescribed procedure including submission of relevant documents on an application which is filed with the JPO and satisfies the following requirements under the JPO-EAPO Patent Prosecution Highway pilot program based on the EAPO application.

When filing a request for the PPH pilot program, an applicant must submit a request form “The Explanation of Circumstances Concerning Accelerated Examination” based on the procedure prescribed in “the Guidelines of the Accelerated Examination and Appeal.” Under the PPH pilot program, an applicant is not required to fill in the section “2. the disclosure of prior arts and comparison between the claimed invention and prior art” in “The Explanation of Circumstances Concerning Accelerated Examination”.

The PPH pilot program will be in effect for three (3) years commencing on 15.02.2018 and will end on 14.02.2021. However, the program may be extended after a joint EAPO-JPO review and assessment of the program implementation.

1. Requirements
   (a) Both the JPO application on which PPH is requested and the EAPO application(s) forming the basis of the PPH request shall have the same earliest date (whether this be a priority date or a filing date).

For example, the JPO application (including PCT national phase application) may be either:
   (Case I) an application which validly claims priority under the Paris Convention from the EAPO application(s) (examples are provided in ANNEX I, Figures A, B, C, H, I and J), or
   (Case II) an application which provides the basis of a valid priority claim under the Paris Convention for the EAPO application(s) (including PCT national phase application(s)) (examples are provided in ANNEX I, Figures D and E), or
   (Case III) an application which shares a common priority document with the EAPO application(s) (including PCT national phase application(s)) (examples are provided in ANNEX I, Figures F, G, L, M and N), or
   (Case IV) a PCT national phase application where both the JPO application and the EAPO application(s) are derived from a common PCT international application having no priority claim (an example is provided in ANNEX I, Figure K).

---

The JPO application, which validly claims priority to multiple EAPO or direct PCT applications, or which is the divisional application validly based on the originally filed application that is included in (i) to (iii) above, is also eligible.

(b) At least one corresponding application exists in the EAPO and has one or more claims that are determined to be patentable/allowable by the EAPO.

The corresponding application can be the application which forms the basis of the priority claim, an application which derived from the EAPO application which forms the basis of the priority claim (e.g. a divisional application of the EAPO application), or an EAPO national phase application of a PCT application.

Claims are “determined to be allowable/patentable” when the EAPO examiner clearly identifies the claims to be allowable/patentable in the latest office action, even if the application is not granted for patent yet. The office action may be either:

(i) Decision to grant a patent (form 301)
(ii) Notification of readiness to grant a patent (form 300)
(iii) Decision on maintenance of Eurasian patent with amended claim(s) (form 500)

(c) All claims on file, as originally filed or as amended, for examination under the PPH must sufficiently correspond to one or more of those claims indicated as allowable in the EAPO.

Claims are considered to “sufficiently correspond” where, accounting for differences due to translations and claim format, the claims in the JPO are of the same or similar scope as the claims in the EAPO, or the claims in the JPO are narrower in scope than the claims in the EAPO.

In this regard, a claim that is narrower in scope occurs when an EAPO claim is amended to be further limited by an additional feature that is supported in the specification (description and/or claims).

A claim in the JPO which introduces a new/different category of claims to those claims indicated as allowable in the EAPO is not considered to sufficiently correspond. For example, where the EAPO claims only contain claims to a process of manufacturing a product, then the claims in the JPO are not considered to sufficiently correspond if the JPO claims introduce product claims that are dependent on the corresponding process claims.

Any claims amended or added after the grant of the request for participation in the PPH pilot program need not to sufficiently correspond to the claims indicated as allowable in the EAPO application.

(d) The JPO has not begun examination of the application at the time of request for the PPH (an example is provided in ANNEX, figure O).

(e) A “Request for Substantive Examination” must have been filed at the JPO either at the time of
the PPH request or previously.

2. Documents to be submitted
Documents (a) to (d) below must be submitted by attaching to “The Explanation of Circumstances Concerning Accelerated Examination”.
Note that even when it is not needed to submit documents below, the name of the documents must be listed in “The Explanation of Circumstances Concerning Accelerated Examination” (Please refer to the Example form for the detail).

(a) Copies of all office actions (which are relevant to substantial examination for patentability in the EAPO), which were sent for the corresponding application by the EAPO, and translations of them if they are not in English.
Either Japanese or English is acceptable as translation language.

(b) Copies of all claims determined to be patentable/allowable by the EAPO, and translations of them if they are not in English.
Either Japanese or English is acceptable as translation language.

(c) Copies of references cited by the EAPO examiner
If the references are patent documents, the applicant doesn't have to submit them because the JPO usually possesses them. When the JPO does not possess the patent document, the applicant has to submit the patent document at the examiner’s request. Non-patent literature must always be submitted.
The translations of the references are unnecessary.

(d) Claim correspondence table
The applicant requesting PPH must submit a claim correspondence table, which indicates how all claims in the JPO application sufficiently correspond to the patentable/allowable claims in the EAPO application.
When claims are just literal translation, the applicant can just write down that “they are the same” in the table. When claims are not just literal translation, it is necessary to explain the sufficient correspondence of each claim based on the criteria 1. (c) (Please refer to the Example form).

2 Machine translations will be admissible, but if it is impossible for the examiner to understand the outline of the translated office action or claims due to insufficient translation, the examiner can request the applicant to resubmit translations.
When the applicant has already submitted above documents (a) to (d) to the JPO through simultaneous or past procedures, the applicant may incorporate the documents by reference and does not have to attach them.

3. Example of “The Explanation of Circumstances Concerning Accelerated Examination” for filing request an accelerated examination under the PPH pilot program

(1) Circumstances
When an applicant files a request for an accelerated examination under the PPH pilot program to the JPO, an applicant must submit a request form “The Explanation of Circumstances Concerning Accelerated Examination” based on the procedure prescribed in “the Guidelines of the Accelerated Examination and Appeal”\(^3\).

The applicant must indicate that the application is included in (i) to (iii) of 1. (a), and that the accelerated examination is requested under the PPH pilot program. The application number, publication number, or a patent number of the corresponding EAPO application(s) also must be written.

*In the case that the application which has one or more claims that are determined to be patentable/allowable is different from the EAPO application(s) included in (i) to (iii) of 1. (a) (for example, the divisional application of the basic application), the application number, publication number, or a patent number of the application(s) which has claims determined to be patentable/allowable and the relationship between those applications also must be written.

(2) Documents to be submitted
The applicant must list all required documents mentioned above 2. in an identifiable way, even when applicant omits to submit certain documents.

(3) Notice
Forms of “The Explanation of Circumstances Concerning Accelerated Examination” are different between on-line procedure and paper procedure. Please refer to the examples of forms when filling in (“Form 1 for Accelerated Examination” for on-line procedures, and “Form 2 for Accelerated Examination” for paper procedures.).
